

# Original Blue Pac: Sustainable Operation With Low Operating Costs

Discover Blue Pac Vertical Original, an innovative and eco-friendly electric crane drive solution. With energy-efficient ePTO technology, emissions and noise are reduced, while operating costs are lowered compared to diesel operation. The slim, customizable modules blend seamlessly with the truck's design, and thanks to standardized battery and motor modules from ETP Power Electronics, installation is simple and smooth. A sustainable solution for the future of the transportation industry.

## Motor and control module

## Battery module, per unit

\* w/o mounting brackets

## Operation:

Pressure peak	385 bar
Flow peak	130 L/min

## Specification:

Battery power	23.5 kWh per unit, scalable
Electric motor power	28 kW S2 60 min, top 45 kW
Internal system voltage	96 V

Battery type	Lithium iron phosphate (LiFePO4)
--------------	----------------------------------

Main connection	16 A, 400V
-----------------	------------

Battery charging time	6-8 hours (depending on the number of battery modules)
-----------------------	--

Motor and control module, mm	W:500 H:750* D:660; 330 kg
------------------------------	----------------------------

Battery module, unit dim. mm	W:500 H:750 D:660; 290 kg
------------------------------	---------------------------

IP rating	Adapted for truck installation
-----------	--------------------------------
